

## S-AF1 ANGLED IMPALING CLIPS

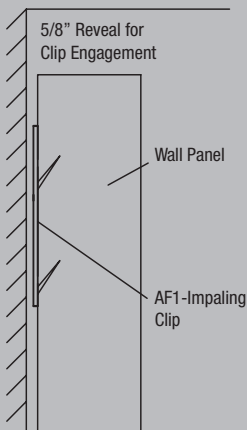

### S-AF1 IMPALING CLIP

### BACK OF PANEL

### CROSS SECTION

### APPLICATION:

For mounting fiberglass acoustical panels spaced off the wall.

### DESCRIPTION:

This installation technique uses a **Angled Impaling Clips** to mount fiberglass acoustical wall panels.

### Installation is as follows:

1. Lay out panel location on wall.
2. Fasten **S-AF1 Impaling Clips** to the wall 30-36" O.C. with the points facing up.

**NOTE:** If panel dimension is less than 48", space clips evenly.

3. Attach panels by pressing down toward the wall so points embed firmly in the back of the panel.

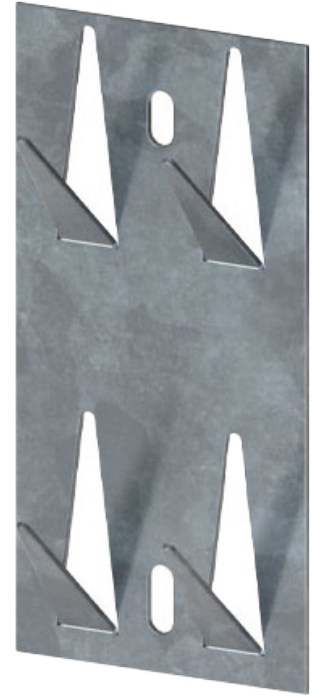

4. This installation technique will leave a 5/8" reveal between the ceiling and the top of the panel.

5. Use the following guide to determine the number of **S-AF1 Impaling Clips** to be used per panel:

PANEL SIZE	NUMBER OF CLIPS
<8 ft <sup>2</sup>	2
>8 ft <sup>2</sup>	4
>16 ft <sup>2</sup>	6
>32 ft <sup>2</sup>	8

Horizontal panels greater than 4' wide & less than 8ft<sup>2</sup> use 3 clips.

**NOTE:** Due to variations in fiberglass thickness and wall inconsistencies, some shimming may be required to align the panel edges.
